written from a transatlantic perspective and based largely on primary sources conceiving carolina provides the first systematic treatment of the colonization of south carolina in over a century it argues that the political culture that developed in the colony amounted to an extension of the political life in early modern england provincial politics in turn shaped social developments notably the emergence of a slave society thus the book calls into question the notion of the inherent distinction and modernity of colonial british america

arming slaves as soldiers is a counterintuitive idea yet throughout history in many varied societies slaveholders have entrusted slaves with the use of deadly force this book is the first to survey the practice broadly across space and time encompassing the cultures of classical greece the early islamic kingdoms of the near east west and east africa the british and french caribbean the united states and latin america to facilitate cross cultural comparisons each chapter addresses

four crucial issues the social and cultural facts regarding the arming of slaves the experience of slave soldiers the ideological origins and consequences of equipping enslaved peoples for battle and the impact of the practice on the status of slaves and slavery itself what emerges from the book is a new historical understanding the arming of slaves is neither uncommon nor paradoxical but is instead both predictable and explicable
