the essential guide for data scientists and for leaders who must get more from their data science teams the economist boldly claims that data are now the world's most valuable resource but as kenett and redman so richly describe unlocking that value requires far more than technical excellence the real work of data science explores understanding the problems dealing with quality issues building trust with decision makers putting data science teams in the right organizational spots and helping companies become data driven this is the work that spells the difference between a good data scientist and a great one between a team that makes marginal contributions and one that drives the

business between a company that gains some value from its data and one in which data truly is the most valuable resource these two authors are world class experts on analytics data management and data quality they've forgotten more about these topics than most of us will ever know their book is pragmatic understandable and focused on what really counts if you want to do data science in any capacity you need to read it thomas h davenport distinguished professor babson college and fellow mit initiative on the digital economy i like your book the chapters address problems that have faced statisticians for generations updated to reflect today's issues such as computational big data sir david cox warden of nuffield college and professor of statistics oxford university data science is critical for competitiveness for good government for correct decisions but what is data science kenett and redman give by far the best introduction to the subject i have seen anywhere they address the critical questions of formulating the right problem collecting the right data doing the right analyses making the right decisions and measuring the actual impact of the decisions this book should become required reading in statistics and computer science departments business schools analytics institutes and most importantly by all business managers a blanton godfrey joseph d moore distinguished university professor wilson college of textiles north carolina state university

use data as an effective tool for school change and improvement this resource helps data team facilitators move schools away from unproductive data practices and toward examining data for systematic and continuous improvement in instruction and learning the book which includes a cd rom with slides and reproducibles illustrates how the authors model has proven successful in narrowing achievement gaps in all content areas and grade levels achieving strong continuous gains in local and state assessments in mathematics science and reading initiating powerful conversations about race ethnicity class educational status gender and language differences developing a vision for a high performing data informed school culture

this book lays out the roles everyone up and down the organization chart can and must play to ensure that data is up to the demands of its use in day in day out work decision making planning and analytics by now everyone knows that bad data extorts an enormous toll adding huge though often hidden costs and making it more difficult to make good decisions and leverage advanced analyses while the problems are pervasive and insidious they are also solvable as tom redman the data doc explains in getting in front on data the secret lies in getting the right people in the right roles to get in front of the management and social issues that lead to bad data in the first place everyone should see himself or herself in this book we are all both data customers and data creators after all we use data created by others and create data used by others and all of us must step up to these roles as data customers we must clarify our most important needs and communicate them to data creators as data creators we must strive to meet those needs by finding and eliminating the root causes of error getting in front on data proposes new roles for data professionals as embedded data managers in helping data customers and creators complete their work dq team leads in connecting customers and creators pulling the entire program together and training people on their new roles data maestros in providing deep expertise on the really tough problems chief data architects in establishing common data definitions and technologists in increasing scale and decreasing unit cost getting in front on data introduces a new role the data provocateur

the motive force in attacking data quality properly this book urges everyone to unleash their inner provocateur finally it crystallizes what senior leaders must do if their entire organizations are to enjoy the benefits of high quality data
